

To Whom It May Concern !

To Allow The NAB To Stifle Competition by Trying To Limit What XM Satellite Radio or other satellite services Can Broadcast is in my opinion Un-American. Where Would Our Computer industry be today If someone tried To hamper the growth of the then upstart Microsoft Corporation over 20 years ago. The FCC Should just leave it's hands off The Freedom of Speech. Perhaps now the FCC has given Americans good reason to call for the Disbanding of the current FCC and to Reorganize The Department. With the replacement of all those who work for and have control over The current Department.

Just The enjoyment alone of being offered something worth listening to by XM Satellite Radio Coropration, In music, news and, and talk other than the Constant Drivel from all the common radio terrestrial stations. Is reason enough to tell the FCC to back off on the idea of even allowing the NAB the slightest chance of Stifling fair competition in Radio.
